Key Vocabulary for Today

In a sentence, the **subject** does the verb.

The **object** receives the verb

The boy = the subject (he's doing the eating)

Word Order

All these sentences use the same words. Only one of them is accurate.

- The witch her wig washed.
- Washed the witch her wig.
- The witch washed her wig.
- Her wig washed the witch.

Which one is accurate and why?
So, what is typical word order in an English sentence?

Ιπποπόταμος

Word order in English

In English is our word order follows a clear pattern.

Our sentences are SUBJECT, VERB, OBJECT (SVO).

All the other parts of speech are put in around these.

Think of three sentences, write them down and check the rule. Does it work?

Can you write one of your sentences using incorrect word order?

Very important in English word order is.

If the word order rule SVO is not followed, we are guessing what is going on. We are unsure who or what is carrying out the action and who or what is receiving the action of the verb.

The witch her wig washed.

The subject is the person doing the action.

The object is the person receiving the action.

In other languages, word order is less important because they use CASES. We'll look at this later today.

Curious sentences some say...

"Truly wonderful, the mind of a child is."

"Much to learn, you still have."

- What is unusual about these sentences based on your grammatical knowledge?
- How would you "translate" them into English?
- Do you know who speaks in such a mysterious way?

- What effect does this way of speaking create?
- Can you speak like Yoda? Translate the following sentences:
 - Everyone should speak a foreign language.
 - We need longer school breaks.
 - Homework is the best part of my day.
- And now think of 5 of your own sentences worthy of a Jedi...

Wie ist es mit Deutsch?

German relies on **cases** to show what is the subject and the object.

So, word order does not need to follow the subject, verb, object rule.

These sentences both mean, "The boy eats an apple".

- Der Junge isst den Apfel.
- Den Apfel isst der Junge.

Both Junge (boy) and Apfel (apple) are masculine nouns in German.

Der is nominative = subject.

Den is accusative = object.

Who is doing what is therefore clear without worrying about word order!
